SURCHARGE FOR WATER PURCHASED

This schedule establishes the procedure to be followed for adjusting, on an annual basis, the Department's metered rate schedules in order to account for price differentials between the Department's metered service rates and the cost of water purchased from other water systems under emergency conditions.

The calculation of the surcharge for water purchased ("SWP") is as follows:

$$\text{Surcharge per CCF} = \frac{(C - (Qa \times Ra))}{Q}$$

Where C = Cost of water purchased from all sources.

Station during previous calendar year, provided such cost exceeds 1.5 percent of the Department's gross revenues from water sales as reported in the same period

Q = Volume of water sold to metered rate customers during previous calendar year

Qa = Volume of water purchased from sources during previous calendar year

Ra = Metered service volumetric rate in effect during previous calendar year, as defined below

For purposes of the SWP, the metered service volumetric rate shall consist of the average volumetric rate (excluding any SWP revenues) applicable to the Department's (1) Rates for Metered Service, (2) Low-Income Rates for Metered Service, and (3) Rates to Other Water Utilities, weighted by the volume of sales to each of these rate classes during the previous calendar year.

Any remaining over- or under-collection of SWP revenues shall be passed back or collected from customers in the following manner:

SURCHARGE FOR WATER PURCHASED (continued)

- (1) If a SWP charge is applicable in a given year, any over- or under-collection resulting from the previous year's application of the SWP shall be passed back or collected from customers through adding the outstanding over- or under-collection to the "C" component of the SWP formula.
- (2) If no SWP charge is applicable in a given year, any over- or under-collection resulting from the previous year's application of the SWP shall be passed back or collected from customers through a true-up adjustment on customer's bills issued after April 1 of the following year. The amount of such credit or surcharge will be determined by dividing the outstanding balance by the Department's total revenues received through the customer service charge component for the previous year to develop a percentage factor, that in turn will be applied to the Department's then-current customer service charge to derive a customer surcharge or credit based on meter size.

The Department will notify customers in simple terms of changes to the SWP, including the nature of the change and the manner in which the SWP is applied to customer bills.

OTHER SERVICES

The Department may impose additional miscellaneous charges and fees for services rendered as specified in Appendix A to the Department's Rules and Regulations.
