Milford Water Company Recognized for Outstanding Service Award Recipient of Mass. DEP

Milford Water Company is proud to announce it has been recognized by the Massachusetts Department of Environmental Protection for outstanding service in 2014.

The award ceremony took place earlier today in Gloucester. Milford Water Company was one of four regional providers of public water recognized. The other regional winners were Fall River, Gloucester, and Monson.

The Mass. DEP announcement read, in part, "While most systems strive just to comply with regulations, your system has put forth an extra effort for several years and has made significant upgrades to your treatment plant and operations."

"It's especially rewarding to be honored for our operational efforts," said David Condrey, manager of Milford Water Company. "We're proud of our new treatment plant, its effectiveness and efficiency, but we've put a lot of effort into making our everyday work match the effectiveness of the new plant. Working for the people and businesses of Milford is what drives us every day."

In the award letter, Mass. DEP Drinking Water Director Yvette DePeiza wrote "Mass. DEP encourages you to continue this level of excellence in carrying out your work of protecting and supplying safe and fit water to our citizens." Said Condrey, "That's our mission, our north star. This recognition gives us added energy to continue our work."
